Effective transport systems are key to our everyday lives. This presentation will explain the concept of intelligent transport systems, and the work done to date on their introduction in Essex. It will outline the driving forces for the systems that have been implemented, how they work and further planned development. The speaker will also present his vision for future transport technology, and provide an insight into current research in this field.

Wednesday 23 October 2002 - 6 for 6.30pm

Telford Lecture Theatre, BAE SYSTEMS

Advanced Technology Centre, Gt Baddow.

The Institution of Electrical Engineers
